

Mini Nicho

Materials:

- Cardboard tube
- Scissors
- Paint
- Markers
- Liquid glue
- Sequins/beads/gemstones (optional)

Instructions:

1. Gently fold the cardboard tube in half.

2. Outline the shape of your window along the fold.

3. Use scissors to cut out your window.

Tip: If the cardboard is too stiff, try folding it a few different ways to make it easier to cut.

4. Fold your cardboard tube so the window is facing out (opposite of your original fold) and crease it firmly.

5. Decorate your mini nicho with paint or markers in the pattern of your choosing! You can even add sequins or gemstones for added sparkle.

Finish it off by displaying something special to you in the window of your nicho.
